EDUCATION

Chulalongkorn University

B.Eng. Computer Engineering – GPA: 3.46

Bangkok, Thailand

2025 – Present

EXTRACURRICULAR ACTIVITIES

Assistant Product Manager

Awarehouse

Sep 2026 – Present

Senior Backend Developer

Information System Development (ISD) – Chulalongkorn University

June 2025 – Present

- Designed API endpoints and core backend architecture, integrating database schemas for high-traffic university platforms, including registration and event websites within an ecosystem serving 100,000+ users.
- Led the backend team through 2-3 week sprint cycles, managing workload distribution, conducting code reviews, and aligning with frontend and PM teams for production delivery.
- Developed backend services in TypeScript, Go, and PostgreSQL, including onboarding flows, authentication/authorization, and an event check-in system.

Developer

Thinc.in.th

Feb 2026 – Present

- Built the live committee scoring system for Miss World Thailand 2026 using Next.js, integrating APIs, room-based authentication, and short polling for real-time updates.
- Maintained the learn.thinc.in.th knowledge platform using Astro, revamping the site for a new brand CI, and enhancing user experience through features such as a table of contents and author attribution.

Software Engineer

Engineering Student Committee (ESC) – Chulalongkorn University

Aug 2026 – Present

- Developed the frontend for an internal finance tracker using Next.js, building dashboard interfaces and charting components to visualize financial data.

PROJECTS

Vishnu24th Camp

- Developed a full-stack Next.js platform for an engineering freshman camp from designing APIs and Firestore schemas to implementation and integrating Firebase Google Sign-In.
- Implemented a token bucket rate limiter for a Popcat replica game to prevent API spam and ensure stability.
- Performed load testing using k6 to measure baseline performance and system throughput.

myCourseVille Parser

- Created a Python CLI tool using BeautifulSoup to automate the scraping and downloading of user-enrolled course materials and metadata.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go, SQL, Python, C, C++, Java

Frameworks & Libraries: Next.js, React, Astro, Express.js, Fiber, Prisma, GORM

Tools: Git, Docker, PostgreSQL, MongoDB, Firebase, Vercel, k6
